

PRESS RELEASE

Next Step Italy: Nash Technologies Finds Group Company in Italy

New project offices in Milan-Agrate and Rome

Rome, Italy, June 20th, 2019. Nash Technologies, a vendor-independent provider of software engineering services and solutions, today announced the founding of its new group company in Italy, Nash Technologies S.r.l. The principal office in Italy is Milan with subsidiaries in Milan-Agrate and Rome. We offer our full portfolio and serving all our markets in Italy: semiconductors, telecommunications, automotive, transportation, and other digital industries.

After intensive preparations we have founded our new Group company in Italy beginning of June. The new company reports directly into the Group Holding. Primary objective of this expansion into Italy is to strengthen and extend our ATE business together with our strategic partner Advantest. In addition, we will gradually expand our service offerings in the Telco space.

Both new offices can easily be reached via taxi from the airports in Milan (Aeroporto di Milano Linate) and Rome (Aeroporto internazionale Leonardo da Vinci). Several hotels and restaurants are in the immediate neighborhood, respectively. Here are the addresses:

Nash Technologies S.r.l. - Project Office Agrate, Italy
Centro Direzionale Colleoni
Palazzo Cassiopea
Via Paracelso 26
20864 Agrate Brianza
Italy

Nash Technologies S.r.l. – Project Office Roma
Piazzale Filippo il Macedone 89
00124 Roma
Italy

The global demand of new chips is robust as never before. The driving forces of this trend are manifold: The Internet of Things and data-driven technologies such as AI, just to name two of them. Enterprises in all kinds of industries transform their business into digital and rely on premium external services in their geographic proximity.

“Based on our data, we see a clear and growing demand on chip testing and ATE engineering in Italy. We are now happy to offer our services in two major Italian metropolitan areas”, says Georg Pielage, CEO of the Nash Technologies Group. “We also have a sharp vision with respect to our services and solutions in the telecommunications industry, to support our clients in the transformation to All-IP in those cases where this requires specialized skill and experience.”

Over the last ten years, VoIP and UC have simplified office communications and allowed both flexible and cost-effective solutions. At the same time, however, it has been difficult to replace the traditional telephony infrastructure in many companies, in particular the manufacturing industries. Nash Technologies expects to grow their business in this area by supporting our clients in this technological transformation, including end-of-life maintenance.

About Nash Technologies

Nash Technologies offers R&D services in the areas of software engineering, ATE engineering, professional services, and solutions. We specialize in the implementation of projects and the competent placement of technical experts. As a strategic partner of Advantest, we develop application test software for Automatic Test Equipment (ATE). We deliver our services and solutions to clients in the industries Semiconductors, Telecommunications, Automotive and Railways, across Europe. Our company is based in Stuttgart, Germany, with offices in Nuremberg, Böblingen, Munich and Cologne, plus two offices in Italy, Milano-Agrate and Rome.
