10 Years of Successful Partnership with Advantest

On September 16, Nash Technologies hosted a special evening to mark the 10th anniversary of its successful partnership with Advantest. The celebration was held at an elegant restaurant in Böblingen, where Nash Technologies welcomed partners and colleagues from Advantest to express heartfelt thanks for a decade of close and successful collaboration.

The event brought together long-time partners and team members in a warm and festive atmosphere. Guests enjoyed a fine selection of regional cuisine accompanied by exclusive wines provided by a local winemaker, adding a special touch to the evening.

“The past ten years have been an incredible journey of innovation, trust, and shared success,” said Georg Pielage, the CEO of Nash Technologies. “We are proud of what we have achieved together and look forward to continuing this strong partnership into the future.”

The evening was filled with laughter, lively conversation, and reflection on shared achievements. It was a fitting tribute to a partnership that has grown stronger with each passing year.

As the semiconductor industry continues to evolve, we are confident that our joint efforts will lead to greater efficiency and new opportunities for growth.

We look forward to deepening our collaboration, expanding our joint activities, and exploring new areas of innovation together.
