# Nash Technologies helps earthquake victims in Turkey

Nash Technologies and its employees donate €20,000 to Médecins Sans Frontières (MSF)

**Böblingen, March 2023. Nash Technologies and its employees are supporting the people affected by the earthquake disaster in Turkey. In February, our company promptly helped with an amount of €5,000. At the same time, employees began a fundraising campaign, coordinated by the works council and the HR department. This collection raised a good €7,400, which the management rounded up again to €15,000. Our support was implemented by Médecins Sans Frontières (MSF), an international network of doctors and many other professionals from the health sector that provides independent and rapid help to people in need around the world.**

"Thank you very much for the generous donations that were received last month as donations of wages. The management of Nash Technologies has decided to double the great donation result of your employees and has again provided € 7,590 for the earthquake victims," says Georg Pielage, CEO of Nash Technologies Germany GmbH. "With the immediate donation of € 5,000 at the beginning of February, the employees together with Nash Technologies have reached a great donation result in total of € 20,000."

Even more than six weeks after the devastating earthquakes starting on February 6 in Turkey and northwestern Syria, people there are in acute need. Médecins Sans Frontières (MSF) is supporting 32 hospitals and health facilities in northwestern Syria with supplies and medical staff, operating four mobile clinics, providing psychosocial support, and providing basic necessities to people who have been left homeless. In the south of Turkey, they work together with local organizations and mainly take care of neglected areas.
