

Nash Technologies Helps in Ukraine

Nash Technologies and its employees donate € 6,500 to Aktion Deutschland Hilft

Stuttgart, Böblingen, and Nuremberg, April 2022. Nash Technologies and its employees participate in humanitarian aid for the Ukrainian population. Right at the beginning of the fighting, Nash Technologies employees spontaneously decided to help by making a donation. This donation campaign was immediately and efficiently implemented by the company management. Within a very short time, more than € 3,000 was collected - more than ever before in a fundraising campaign. The management rounded up this amount to € 6,500.

"Our aid was implemented by Aktion Deutschland Hilft, an alliance of German aid organizations that provides fast, coordinated and effective help in the event of disasters," explains Georg Pielage, CEO of Nash Technologies. "Aktion Deutschland Hilft can build on a large network in Ukraine through its member organizations. In this way, the aid directly benefits the people on the ground and the suffering among the population is alleviated."
