

Nash Technologies Helps Flood Victims

Nash Technologies and its employees donate € 6,000 to Aktion Deutschland Hilft

Böblingen, August 2021. Nash Technologies and its employees support the people affected by the flood disaster. In July, our company promptly helped with an amount of € 2,000. At the same time, employees began a fundraising campaign, coordinated by the works council and the HR department. This collection raised a good € 1,800, which was rounded up again by the management to € 4,000. Our support was implemented by Aktion Deutschland Hilft, an alliance of German aid organizations that provides rapid, coordinated, and effective help in the event of disasters.

Rainer Abbenseth - our works council chairman - announced the result of the employee fundraising during our summer party on August 12, 2021. This year's party was hosted by the Kraxlalm in Rutesheim, a versatile amusement park with catering.

Under a bright blue sky with sunshine, the staff spent the afternoon with an Olympics specially organized by the staff of Kraxlalm. With temperatures around 30°C, this was a special treat. By the way, Nash Technologies also caught up with the celebration of its 10th anniversary, which unfortunately could not take place last year due to the pandemic measures.
